	<b>Title</b>	<b>Abstract</b>
1	Business alliance identification in a web architecture	
2	Increased visibility during order management in a network-based supply chain environment	
3	Methods and apparatus for querying a relational data store using schema-less queries	
4	System and method for creating and managing survivable, service hosting networks	
5	Modeless event-driven data transformation	
6	Advanced web bookmark database system	
7	Business alliance identification in a web architecture framework	
8	Problem isolation through translating and filtering events into a standard object format in a network based supply chain	
9	Media recording device with packet data interface

	<b>Title</b>	<b>Abstract</b>
10	Prioritizing components of a network framework required for implementation of technology	
11	Providing collaborative installation management in a network-based supply chain environment	
12	Identification of redundancies and omissions among components of a web based architecture	
13	Dynamic customer profile management	
14	System for establishing plan to test components of web based framework by displaying pictorial representation and conveying indicia coded components of existing network framework
